Built Green
for life

BuiltGreen Canada

The BuiltGreen™ Program
BuiltGreen Canada

Look for the Built Green logo.

If you're building a home, you'll never have a better opportunity to create an energy-efficient, comfortable environment for you and your family. There's something about walking through the door of your Built Green™ home that makes you feel good. It's not just the quality construction, cleaner air and energy efficient operation - it's knowing you've made the right choice for your family and your world for today and tomorrow. All it takes is our Built Green™ program.

why go green?

save money

Next to a mortgage, energy costs are the most significant household expense. Built Green Canada certified member builders, build energy efficiency into your home's design. By choosing energy efficient options, you'll be making a choice to help protect our environment tomorrow and save money today.

comfort and health

Certified Built Green™ homes incorporate products that reduce the sources of indoor pollution. Solid, draft-free construction ensures even temperatures throughout your home and choosing innovative ventilation systems keep fresh air circulating all year round. You and your family and breathe easier.

quality

A Built Green™ home is a superior product. The program encourages the use of more durable materials, inside and out, reducing maintenance and replacement costs.

When you choose a Built Green™ home, you'll deal with a certified Built Green™ home builder who is specially trained in and committed to using that latest technology in green design and building. Built Green Canada homes are independently audited to ensure each home meets the rigorous criteria laid out by the program. Choices on equipment, appliances and building materials can save you money now while helping to increase the value of your home later.

Built Green Canada is a flexible and affordable way to make a difference while creating a healthy home environment for you and your family. Take your first step towards a green future. The Built Green™ Canada program promotes practical and effective environmental conservation solutions we can easily integrate into our everyday lives.

The Built Green™ Canada program offers increasing levels of green options, allowing families to choose what works for them.

Built Green Canada homes just make sense. Now and for the future.

A certified Built Green™ Canada home meets energy efficiency, water conservation and sustainable building practices as outlined in the Built Green Canada program. Not just any home can call itself Built Green™, so if you're shopping for, or building a new home of your own, make sure it's Built Green™ Canada certified. Look for the Built Green Canada certified builder logo when choosing the builder for your new home.

DID YOU KNOW?

- Canadians use more energy per capita than any other country in the world. Energy consumption has increased 10% since 1990.
- Canadians generate more garbage per capita than any other country in the world.
- Average Canadians spend 90% of their time indoors. Poor air quality in homes and buildings are cited as likely contributors to Asthma, the most common childhood respiratory disease.
- A household of four people taking daily five-minute showers consumes a lifetime supply of drinking water for one person every six months.
